ABSTRACT

This teacher's manual accompanies the six curriculum guides for the six levels (I-VI) in the Guam Community College English as a Second Language (ESL) project series (see note). A structural outline for the ESL project is first presented that discusses the lessons, levels, tests, materials, vocabulary, and scope and sequence. Next are described the Peabody kits around which the project centers, namely Peabody kits P, Level P, Level 1, Level 2, Level 3, and the Articulation Kit. The ESL vocabulary is then provided for all levels (I-IV) with the level and lesson indicated in which the word is first presented. The second half of the manual outlines the scope and sequence of each of the levels. For each level this information is given: vocabulary by part of speech and lesson with objective and the sentence, sound, or printing structure studies. (YLB)

FOREWORD

Foreword

The materials which are herewith included in the ESL Project are the results of many hours of search, research, and co-operation from many people and places.

The project is an accumulation of many materials and the suggestions of people who have given time, thought, and expertise to help make it become possible.

It is my thanks to those who listened, suggested, and gave invaluable advice when the lessons snared themselves into an almost impossible impasse.

My special thanks to those who contributed to the development of the reading and writing portion of this project and whose understanding of the problems to be faced made that segment easier to handle.

And to those who will use the materials, may your teaching-learning situation be made easier and more valuable to help the student through the English language.

Leonard Flander

STRUCTURAL OUTLINE

STRUCTURAL OUTLINE FOR ESL PROJECT

THE LESSONS:

Each lesson has three parts. Drill A will review the previous lesson materials. Drill B will develop and expand new vacabulary; and Drill C will continue the process of B or add additional exercises. This is a general rule. It is most frequently followed but when the need arises, Drill C may become a continued process of B.

The lessons interlock. Drill A assures that the previous lesson is reviewed before the new material is presented in the next lesson. The interlocking pattern is also duplicated vertically. That is, after the first twenty lessons, Lesson Twenty-One, develops the more important items from Lesson One. Each twenty lessons, therefore, will reach back twenty lessons for material.

The lessons are carefully constructed so that no new word is introduced without drill. There are a few exceptions to this rule, but the words in question are minor words and do not infringe on the learning process.

Most new words are introduced with drills within Drills B and C.

The lessons are aimed at a trade and technical, adult-based, learning experience. From the first lesson to the last, this concept is the most outstanding feature. The lessons are structured for the adult learner and adult learner-interest, with emphasis on Guam and island living.

THE LEVELS:

There are six levels in this ESL project. Levels I-IV are basically vocabulary orientated with sentence structure in three simple tenses and simple sentence patterns.

Levels V and VI expand the trade and technical knowledge into specific fields: Construction Trades, Mechanical, Electro-Mechanical, Engineering, and Business.

In Level V Construction Trades are in lessons 1-3, 21-23, and 16-18; Mechanical in lessons 4-6, 24-26, and 36-38; Electro-Mechanical in lessons 7-9 and 27-29; Engineering in lessons 10-12 and 30-32; Business in lessons 13-15 and 33-35.

A General Review is given for Lessons 19,20 and 39,40. for Level V and VI.

In Level VI the pattern for Level V repeats with the exception of Electro Mechanical which has Lessons 16-18 and Business which has Lessons 36-38.

Level V begins Reading Readiness throughout all the lessons from 1-40. This process continues through the first ten lessons of Level VI by which time all the basic sounds and letters have been introduced.

Level VI contains the beginning writing segment of the ESL program. From Lesson 11-36 all the letters of the alphabet are taught in their printed form both for capitals and for small case letters.

Lessons 37-40 of Level VI contain the printed form of numbers 1-10 only.

No sentence or words in full form are taught in writing. This project is aimed at giving the learner a basis for the writing process as well as a reading process.

THE TESTS:

Each Level has two tests: a pre test and a post test. Both test forms contain ten questions and are aimed at progression of difficulty and comprehension throughout the program. The tests with the directions are given in a separate section of this gathered material.

THE MATERIALS:

The entire ESL project centers around the Peabody Kits P, Level P, Level 1, Level 2, Level 3, and the Articulation Kit. The special-market kits have been tagged because they represent the numbering system used throughout the entire lesson plan sequence. The Peabody numbering system has been utilized within the lessons, and therefore, following them will make the presentation of each lesson much easier.

The entire list of accumulated materials both from the kits and from outside sources is included in this section for quick and easy references. The gathered resources is the result of a long and time consuming effort which has attempted to make the presentation of the lessons simpler and more valuable with the least amount of effort on the instructor's part.

THE VOCABULARY:

The entire vocabulary for all six levels has been included in alphabetical order for convenience and easy reference. The words are given as they generally appear. Some nouns with adjectives are learned almost as if they were a complete word. These have been included as compound words to facilitate reference and understanding.

Each word is given with the lesson in which it first occurs.

THE SCOPE AND SEQUENCE:

Each lesson for the six different levels is clearly identified in the scope and sequence section. The parts of speech are listed by Noun, Pronoun, Verb, Preposition, Adverb, Conjunction, and Adjective. For each lesson the words are separated into their groupings and are found beside each lesson number with identifying lines in cross-section.

Each lesson for each level is numbered in this section. Each lesson with its Objectives are clearly stated and identified. It is, therefore, easy to assess the value of each lesson and its goal because of this particular section. All words used are also identified here. They are then found in the proper category of their work. The words are also found in the Vocabulary section with a given cross-reference.

Sentence Structures are given only when they are important structures but they are noted when first introduced and are not repeated again in the scope and sequence section. The Sentence Structure changes in the last two levels of this program to become Sound Structure and then later to Printing Structure. Both of these items are given as such to enable clearer identification of the specific skills which are being taught at that level and specific lesson.
